# Jet Ski

Water activities Safety Guideline

## Pre-Activity

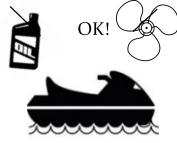

### Participants

- Select qualified service providers (registration or insurance documents)  
※ Official on-line website and QR code scanning are also available.
- Follow the introduction and notification from instructors.
- To familiar with the facilities.
- Maintain healthy physical condition.
- Be aware of the area and environment of the activity.
- Ensure the instruments/gears are functional.
- Qualified instructors are required.

### Service Providers

- To know the local weather conditions. (wind, current, and tidal change)
- To familiar with the facilities.
- Introduction to the equipment, demonstration of the activity, and safety education.
- Gear check: Jet Ski parts, fuel, cooling water intake grate, etc....
- Communication devices and first aid kit.
- Briefing and safety reminders.

## During-Activity

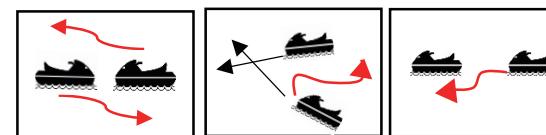

### Participants

- To follow the instruction and prevent from dangerous acts.
- Getting on- and off-board from the stern of the Jet Ski.
- Make sure all equipment and gears are functional.
- To inform your instructor(s) when feeling ill.
- Stay calm, floating with lifejackets, and waiting for rescue when accidentally going overboard.

### Service Providers

- Inserting the on/off switch and putting the safety lanyard on your wrist before starting the engine.
- Checking the gauges.
- All vessels must travel at a safe speed at all times. Keep your distance form other objects.
- Head-on situations: Each vessel alters course to starboard (right) and passes port to port (left). Always assume this situation exists. °
- Crossing situation: A vessel approaching from your starboard (right) side has right of way. However, if the other boat does not give way, you must take action to avoid a collision. °
- Overtaking: If you are overtaking a Jet Ski, you can do so at port side of the PWC you wish to pass. However, you must keep well clear of the boat you are overtaking.

## Post-activity

### Participants

- Return all instruments and gears.
- Do not leave your personal belongings and trash behind.

### Service Providers

- Counting heads and gears.
- To rinse, maintain all snorkeling gears and proper storage.
- To prevent engine parts from rusting, leave the seat cover open after rinsing the engine room until dry.
